up to 30 Mbit/s_{down} for 16,90 EUR*

* Presentation of a valid student card/certificate of enrolment is necessary. Cable TV connection required (costs from 11.00 – 13.99 EUR/month (depends on the living address) if not included in rent.) Minimum term of contract 12 months. It will extend always automatically for further 12 months if it will not be cancelled 1 month in advanced, always to the end of the particular contract period. The cancellation then is valid to the particular end of month of the month in which the contract period expired. The discounted price of 16.90 EUR/month is valid for 12 months. On presentation of a new valid certificate of enrolment the contract will be prolonged for further 12 months. In case of missing certificate of enrolment the contract will be prolonged to the normal price of 21.90 EUR/months. Provision of cable modem free of charge (25.00 EUR deposit). Onetime payment for hardware WLAN cable modem 35.00 EUR (25.00 EUR deposit). All prices include VAT.

Hello!

Stefan Berger

Welcome to the University of Magdeburg. High-achieving, dynamic, ambitious, international and with research-led teaching, Otto von Guericke University (OVGU) is one of Germany's newer universities. Our research and teaching focuses are engineering and the natural sciences, economics and business, and medicine. With these course offerings complemented by forward-looking humanities subjects, in its 25 years of

existence, the university has acquired an excellent reputation, both at home and abroad. Over 14,000 students are enrolled in more than 80 programmes, some of which are quite unique. The 200-plus professors see themselves as dedicated communicators of knowledge and trailblazers in empowering students to be able to attain successful careers. Every year the university produces around 2,700 highly qualified graduates.

CAPITAL CITY

In the heart of Germany

Magdeburg is the capital of Saxony-Anhalt. The state is located in eastern Germany. The city is 150 km from Berlin, a good 230 km from Dresden and almost 300 km from Hamburg.

With over 240,000 residents, the city is easy to get around and not too big. Magdeburg is a comfortable, affordable, and safe place to live. The cost of studying is low, and crime rates are also low in comparison with other metropolitan areas.

Magdeburg has many faces. It is a city on the move – dynamic, personal, multicultural and full of contrasts.

Everywhere, the changes that have taken place over its two thousand years of history have left their unmistakable mark. The architecture of this 240,000-strong city is characterised by medieval castle buildings, enchant-

View of the old town at night

With a quarter of a million residents, Magdeburg has a reasonable size – perfect for enabling students fully concentrate on their studies.

A Great History

It is not as obvious from today's modern city, but Magdeburg is one of the oldest towns in Germany. As long ago as the 9th century, there

Andreas Lander

was a mighty border fortress on

Statue of Emperor Otto 1th in Alter Markt.

ing villas from the era of industrial expansion in the late 19th century. Modern buildings have largely replaced the destruction brought by the Second World War. Magdeburg is also a green city with plenty to do such as picnicking in the park, taking a stroll by the river or enjoying a night out.

Sometimes I see deer, foxes and rabbits running around in the wild area near the Wissenschaftshafen (Science Port).

H. Krieg

Xueling Sun from China, Management

the banks of the Elbe. Later, the first German Emperor, Otto 1th, chose Magdeburg as his preferred residence. Magadoburg, as the town was still known at the time, was a centre of power in medieval Europe and made a name for itself with its free trade and progressive legal system. In the 16th century, it was the first major city to proclaim its support for the reformatory beliefs of Martin Luther and defended the new religious movement against the forces of the Holy Roman Emperor. During this religious war, the city was completely destroyed in 1631. Its reconstruction was organised by the brilliant scientist and mayor, Otto von Guericke, to whom the university owes its name.

An international player

International, student-friendly and strong in research, the University of Magdeburg has an excellent reputation across the world. Traditionally, our main areas of focus are engineering and the natural sciences, along with medicine. The university and its courses in Mathematics and Computer Science regularly reach the higher echelons of renowned ranking lists. Many of the courses of study offered in

This is an institution with a great international orientation, well-structured, distinguished courses and opportunities.

economics and business, social science and the humanities are also unique within Germany. Due to the bilingual availability of certain programmes, they are also highly attractive internationally. Alongside the varied range of courses on offer, the appeal of the university is thanks to its outstanding infrastructure and excellent staff-student ratio. The

campuses stand out because of their compact size and proximity to the city centre. The cafeterias offer a variety of options including multiple healthy choices.

The university library is a central

hub for all students. The state-of-the-art building provides free access to an outstanding catalogue of research literature. Today, one

Lecture in Lecture Hall 5 at Otto von Guericke University

Andreas Lander

Otto von Guericke (1602-1686)

Otto von Guericke was an inventor, scientist, lawyer and politician. He was one of Magdeburg's greatest sons and gave his name to our university. He discovered vacuum technology and electrostatics, and conducted experiments on air pressure, vacuums and electricity. In 1654 he fascinated the world with his hemisphere experiment at the Imperial Diet in Regensburg. Sixteen horses could not break apart something that atmospheric air pressure alone was holding together – two halves of a copper sphere created by Guericke.

Otto von Guericke pumped out all of the air.

in six students comes from another country. This makes the campus international and student life colourful. Influences from more than 100 countries enrich the theoretical and practical education of young women and men at the university.

International student life on campus

Stefan Berger

Otto von Guericke

Are you prepared?

In order to study at the University of Magdeburg you will need a certificate providing evidence of the level of education you have attained so far and which entitles you to study in Germany. To commence studying for a Master's degree, you must already have obtained a first academic degree. The recognition of qualifications varies according to the country of origin. For many courses, additional subject

requirements apply, or there may be a limit to the number of admissions. Furthermore, for some courses, practical experience is required before you can begin your studies. Whether or not an applicant may be admitted will only be decided after his or her application documents have been examined.

Preparatory College

Not every secondary school diploma obtained abroad is enough to entitle its holder to study in Germany. Foreign applicants without a recognised diploma who wish to study at the University of Magdeburg may apply to the state preparatory college or one of the private preparatory colleges in Magde-

Andreas Lämder

Getting around town with a semester ticket

For a city with almost a quarter of a million inhabitants, Magdeburg has very few traffic jams.

burg (MDWI AG or Europäisches Studienkolleg der Wirtschaft (European Preparatory College for Economics)). In order to ensure that applicants are able to successfully participate in the courses, they must complete an entrance examination in German and, when applicable, Mathematics. Applicants to MDWI's preparatory college may commence their course without any prior knowledge of the German language.

Stefan Deutsch

This is due, among other things, to the excellent public transport system. Trams and buses always have right of way, which means that it is possible to get from the suburbs into the city in just a few minutes.

All students receive a semester ticket with which they can use the buses and trams at any time. The only simpler and nicer way to get around town is by bike. With all this, who needs a car?

H. Krieg

Alejandro Gonzales, Colombia, Mechanical Engineering

Magdeburg has got an excellent tram system and a very nice infrastructure.

Do you speak German?

Language of instruction – German

The majority of courses at the University of Magdeburg are taught in German. This means that rule applicant must have passed one of the following examinations:

- » Deutsche Sprachprüfung für den Hochschulzugang ausländischer Studienbewerber (German language examination for admission)
- » of foreign applicants to university) (DSH-2)
- » Test DaF (all four parts at least to level 4)
- » Deutsches Sprachdiplom der Kultusministerkonferenz (German language diploma of the Standing Conference of the Ministers of Education and Cultural Affairs of the Federal States), level 2
- » "Prüfungsteil Deutsch" (German Examination) as part of the entrance examination at preparatory college
- » Goethe Certificate C 2: 'Großes Deutsches Sprachdiplom' (Major German Language Diploma), from 01.01.2012
- » telc German C1 University
- » Applicants who have not passed any of the above-mentioned examinations must prove their

Language of instruction – English

Many international Master's degree programmes and one Bachelor's degree programmes are offered in English. For this you must provide evidence of adequate mastery of the English language, as a rule at level B2 or C1 of the Common European Framework of Reference for Languages. Native speakers from Great Britain, Ireland, Canada, USA, Australia and New Zealand are exempt from this rule, as well as holders of certain English-language secondary school diplomas and Bachelor's degrees. The following certificates are recognised:

Everyone is very familiar with everyone else and even teachers talk to us like we're friends.

H. Krieg

Anna Todorova from Ukraina, European Studies

An excellent study environment

The University of Magdeburg is a campus university. We have nine faculties and a multitude of renowned research partners. However, we still prioritize offering individual support and advice to each student. The professors know their students personally. The focus of research and

teaching is on engineering and the natural sciences as well as medicine and economics. The range of subjects is complemented by innovative courses in economics and business and forward-looking humanities subjects. Students learn in modern, well-equipped lecture halls, while research and experimentation takes place in our brand new laboratories and workshops. Students have the choice of over 80 courses. Many of which are interdisciplinary. Subjects range from computational visualistics, medical technology and mechanical engineering to mathematical engineering. The number of English-language programmes and programmes with an international orientation is constantly growing, and some are unique in the whole of Germany. The Bachelor's and Master's programmes in technical subjects enjoy an excellent reputa-

Basic and applied research

Otto von Guericke University is a dynamic, strong research institution with a worldwide reputation, and we see ourselves as a pioneer of technological developments and a pacesetter beyond regional borders. Our research activities are characterised by scientific curiosity and

engineering expertise combined with social responsibility and global thinking. The key areas of research focus are currently the neurosciences and complex dynamic systems. Medical technology, fluidised bed technology, biosystems technology, automotive, digital engineering

Stefan Berger

Training on the magnetic resonance tomograph on the STIMULATE research campus

Stefan Berger

German engineering

Welcome to the land of engineering ingenuity, inventiveness and the proverbial reliability. Technology “Made in Germany”

has an outstanding reputation worldwide. German engineers are known for inspiring new technologies and technical solutions which result in a higher quality of life, a better environment, and an increased level of prosperity. In Magdeburg, this fascination with technology has driven engineering research for over half a century. In this context, Otto von Guericke University sees itself as a think tank for technology that offers convincingly high standards of technical expertise. The education and training in engineering is innovation-driven. Our industrial partners include small and medium-sized local companies as well as global players in the automobile industry, mechanical engineering and renewable energy fields.

and renewable energies are some the main areas of research transfer. Through this process, the university cooperates in many projects with renowned external research institutions and companies.

the campus and everyday life as a student, help them to learn German or deal with any complicated administrative issues. Often new friendships are made during these few days that continue after students leave the university. www.ovgu.de/Internationale_Studieninteressierte/Organisation+des+Aufenthalts.html

The communal kitchens are not just for cooking in a flatshare, but are also good places to come together

Cheap and safe

In Germany, the cost of living is often quite high. In many university towns, accommodations for students are becoming more expensive than ever and harder to find. However, in Magdeburg there are still numerous opportunities for students to find a cheap place to stay – whether in the student union residence hall, in a studio apartment, in your own flat, or in a

Being a few minutes away from everything that is happening is the best.

H. Krieg

student flatshare. No matter which part of the city your new home is located – the journey to the university, city centre or the Elbe by tram, bus or bike is always a short one.

Residence halls

The state-run student union has almost 1,500 spaces in their Magdeburg residence halls. They are very popular among foreign students due to their central location and economical value. Rooms of 20-25 m² cost € 220-240, including all associated costs.

www.studentenwerk-magdeburg.de

Own studio apartment

One or two-room studio apartments are ideal for young people who want to live alone. The restored old buildings in the city have charm and offer you the chance to live “at the heart of things”. The price per

Rental price comparison

square metre of living space is around € 6 plus the costs for electricity and heating. That is only half as much as in major German cities such as Berlin or Munich.

www.immobilienscout24.de

Munich:	€16.55/m ²
Frankfurt am Main:	€13.37/m ²
Cologne:	€11.50/m ²
Berlin:	€11.42/m ²
Hamburg:	€11.37/m ²
Magdeburg:	€6.07/m ²

Room in a flatshare

Those who prefer to live with a “substitute family” can apply directly with the occupants for one of the numerous free rooms in a flatshare. In the kitchen – the heart of almost every flatshare – there is always someone to talk or cook with. This often leads to a feeling of belonging that can only have a positive influence on your studies.

The Campus Tower hall of residence is right next door to the university

Of course students also take part in the annual Indian Night in the Festung Mark cultural centre.

Come together, live together

The foreign students at Otto von Guericke University come from over 100 nations from every continent. The majority are Indian, Chinese, Ukrainian and Pakistani. They have set up their own communities on campus, and play, pray, celebrate and cook traditional meals from their home countries together. The events organised by the student

associations on national holidays are great introductions to other cultures and bring a strongly cosmopolitan flavour to Magdeburg. For example, the Magdeburg Indians e.V., with its 1000 active members, holds one of the largest national festivals in the city with its annual Indian Night, where the Indian culture is celebrated with their guests. The Association

COUNTRYSIDE

The centrepiece of the canal crossing near Magdeburg is the almost 1 km-long trough bridge on which the Mittelland canal passes over the river Elbe.

Castles, Forts, Imperial Palaces

Of all the German states, the federal state of Saxony-Anhalt is among the richest in terms of monuments. The region between the Harz Mountains and the Elbe is a “heartland of German history” where countless historical locations can be discovered. For example, the 3600 year-old bronze “Nebra Sky Disc”, is the world’s oldest depiction

Nebra Sky Disc

of the cosmos and is a unique historical artifact of human history. Just an hour away from Magdeburg is Wittenberg, where in 1517 the Augustinian monk, Martin Luther, nailed his 95 theses to the door of the castle church, initiating the Reformation in the process. Today the Luther memorials in Eisleben and Wittenberg are important UNESCO World

Half-timbered houses in Quedlinburg

Legendary Harz

On a clear day the mountains of the Harz, which are over 100 km away, can be seen from Magdeburg. The 1142 metre high Brocken is excellent for exploring on foot, while those who prefer things a bit more leisurely can take a romantic train ride with the Harz Narrow Gauge Railway. The trains, which are pulled by billowing steam locomotives, travel right to the summit! A magnificent experience indeed! The Harz is also a legendary cultural landscape. Defensive fortresses, ancient mines and medieval half-timbered towns bear witness to life in days gone by.

Andreas Lander

Cultural Heritage sites. Others in the area include the Dessau Bauhaus, the old town of Quedlinburg with its collegiate church and castle, and the Garden Kingdom of Dessau-Wörlitz. There are splendid churches and castles, forbidding fortresses and over 1000 year-old royal palaces to be discovered on day trips around the state capital of Magdeburg.

In my leisure time I usually explore Magdeburg by cycling in the nearby city. So green and peaceful!
